

ADFS INTEGRATION WITH OFFICE 365 FOR A LEADING INTEGRATED **HEALTHCARE** DELIVERY SERVICE PROVIDER IN INDIA.

SUCCESS STORY

ENGAGEMENT:

Project based

INDUSTRY:

Healthcare

OFFERING:

Enterprise ADFS
Integration with
Office 365

BUSINESS CHALLENGE

After completing the migration of on-primes exchange to cloud, we found the password policy is differently working for office 365 and users are facing this issue regarding the password expiration, password complexity, password history.

Our Solution

Active Directory Federation Services (AD FS) is a software component developed by Microsoft that can be installed on Windows Server operating systems to provide users with single sign-on access to systems and applications located across organizational boundaries. It uses a claims-based access control authorization model to maintain application security and implement federated identity.

BENEFITS

Microsoft ADFS is an advanced feature for SSO for organization users, where users are getting authentication with on premise Active Directory. All password policies are same as that of on-premise Active directory.

ABOUT PROGRESSIVE INFOTECH

Trusted IT partner since 1998, Progressive Infotech provides comprehensive suite of transformation and support services. The offerings span across cloud, digital and support operations, delivered through a matured and scalable service delivery model. In every client engagement, Progressive ensures clients realize higher ROI, stretch the intrinsic value of existing IT investments and are better prepared for emergent market changes.

Progressive Infotech is consistently featured as a “mature vendor for IT Outsourcing” in the Gartner hype cycle report for ICT in India for last few years.
