

A LARGE MULTI-SPECIALITY HOSPITAL MOVES THEIR ENTIRE DATA CENTER ON CLOUD

SUCCESS STORY

ENGAGEMENT

STRATEGIC IT PARTNER

INDUSTRY

HEALTHCARE

OFFERING

DATA CENTRE ON CLOUD

COMPANY PROFILE

The client is part of a global healthcare chain which has been in business since 2001 and today has a presence in various geographies across multiple healthcare verticals - from hospitals, specialist clinics, laboratories to imaging centers.

CHALLENGES

To support the continuous expansion of their healthcare services, the client needed a cost-effective and scalable platform to deploy and run various healthcare related applications.

“AWS turns out to be an obvious choice for us. Being able to manage everything on the same environment without being worry about the uptime of the hardware was most important for us. With AWS we are now able to focus more on our applications rather than hardware maintenance”

– Senior Systems Engineer

Solution

We recommended AWS as the preferred cloud platform for the client as they could leverage the scalability and agility of AWS cloud with its enterprise grade networking options that helps the hospital to enable low-latency communication between different applications and easily scale for their workloads.

With daily automated snapshots, the application data backup process has become a breeze.

Advantages

Create your own virtual private environment on cloud and setup the applications as if they are on-premise on a LAN environment.

Dramatic cost reductions in testing environment as you only pay for the time you switch on the servers and obtain unlimited scalability and agility for all your Windows or Linux based applications.

ABOUT PROGRESSIVE INFOTECH

Trusted IT partner since 1998, Progressive Infotech provides comprehensive suite of transformation and support services. The offerings span across cloud, digital and support operations, delivered through a matured and scalable service delivery model. In every client engagement, Progressive ensures clients realize higher ROI, stretch the intrinsic value of existing IT investments and are better prepared for emergent market changes.

Progressive Infotech is consistently featured as a “mature vendor for IT Outsourcing” in the Gartner hype cycle report for ICT in India for last few years.
